MEMORANDUM

TO	:	All Store Heads / Store Supervisors / OICs / Concerned Store Personnel
FROM	:	Store Operations – Head Office
DATE	:	November 2026
SUBJECT	:	**Mandatory Implementation of the Store Operations Automated Month-to-Date (MTD) Report**
EFFECTIVE DATE	:	**November 14, 2026**

1. PURPOSE AND OFFICIAL IMPLEMENTATION

This is to inform all concerned that the **Store Operations Automated Month-to-Date (MTD) Report Web Application** is hereby officially implemented **effective November 14, 2026**.

Beginning on this date, all covered stores are required to use the application for their daily sales reporting, retail drivers, and cash monitoring (EOD, Deposit and SG Receipt). Every figure a store enters is sent automatically to the Area consolidators and Head Office, which compute the month-to-date sales, achievement against target, and growth versus last year.

This is a **mandatory** implementation, not a trial. Compliance is required from all concerned stores.

2. APPLICATION ACCESS

- Application link: **https://qii-mtd-dashboard.web.app** (use a computer or laptop with a modern web browser, such as Google Chrome, and internet access).
- Each store has its own store account. Sign in only with the username and password assigned to your store by the Store Operations Super Admin.
- **Do not share your password.** Always sign out when using a shared computer.
- For login or password concerns (e.g., forgotten password), coordinate with the **Store Operations Super Admin**, who will set a new password for your account.

3. DAILY REPORTING REQUIREMENT – 12:00 NOON DEADLINE

Every morning, the assigned store personnel must update the **previous day's (YESTERDAY's) figures** in the application **not later than 12:00 noon**. **Entries made after 12:00 noon of the following day are automatically marked LATE by the system.**

The following must be updated daily, based on the store's actual POS reports and daily records:

1. **Input Sales** – Daily Gross Sales and the applicable sales details from the POS report (discounts, approved discount, delivery fee, shortage, overage).
2. **Retail Drivers** – Buying Customers (No. Customer) and Entering Customers, together with the other driver columns in the sheet (e.g., racquets strung, shoes sold), as applicable. Batting Average and Average Purchase are computed by the application from these entries.
3. **Input Manual Sales** – Manual sales and manual returns, when applicable. Register the store's manual SI booklets in the MANUAL SI BOOKS field before entering Manual SI numbers.
4. **EOD Monitoring** – End-of-day readings of each POS.
5. **Deposit Summary** – Cash sales, amount deposited, deposit slip date, and the personnel who prepared and checked the deposit.
6. **SG Receipt Monitoring** – Total regular sales and the SG receipt copy for the day.

All information must be **complete and accurate**. Figures entered must agree with the store's actual daily reports.

4. MONTHLY STORE SETUP

- **Gross Sales Target** – Enter the store's monthly Gross Sales Target on the **first day of each month**. Each new month starts with a blank target.
- **Last Year's Sales** – Load or update the previous year's sales for the same month once a month, through **MTD History** or the **Seasonality Template**, as applicable. This is required so that the daily target and growth versus last year are computed.
- **Reporting Month and Year** – Always check the Month and Year shown at the top of the screen before entering or importing any information. Data is saved to the month displayed.

5. DAILY MONITORING AND VERIFICATION

- Check the **Daily Store Tasks** board every day. All tasks (Sales Update, Retail Drivers Update, Last Year's Import Sales, and Sent to Head Office) must be completed and reflected as **Done**.
- Open **Daily Sales Sync** and verify that each day is marked **Synced** and that MTD at Head Office matches the store Dashboard MTD.
- All entries are saved and transmitted automatically to the Area and Head Office accounts. **There is no separate Submit button, and no e-mail submission is required.**
- **Store closures:** If the store was closed on any day, enter the appropriate remark (e.g., **STORE CLOSED**) in the Remarks field of Daily Sales Sync for that day. A day with no gross sales and no remark is tagged as a **Missing Day**.

6. ACCOUNTABILITY OF STORE HEADS

Store Heads, Store Supervisors, and OICs are responsible for ensuring that:

- Assigned personnel are properly oriented on the application and the attached User's Guide;
- Daily sales and all required information are entered accurately and within the 12:00 noon deadline;
- All daily tasks are completed (Done) and synchronized (Synced) with Head Office;
- No reporting date is left without an update or the appropriate remark; and
- Any access, technical, or data discrepancy is promptly raised with the appropriate Store Operations contact.

Delegation of data entry does not relieve the Store Head of the responsibility to monitor and ensure compliance.

7. IMPLEMENTATION AND REFERENCE GUIDE

Attached is the **Store Operations Automated MTD Report – User's Guide**. All concerned personnel are directed to review and familiarize themselves with the guide **before November 14, 2026**. The guide contains the complete step-by-step procedures, screenshots, troubleshooting instructions, and access information per account role, and shall serve as the stores' primary reference in performing the required tasks.

Note: After an update of the application, press **Ctrl + F5** once to load the latest version.

8. MANDATORY COMPLIANCE

Strict compliance with this memorandum is expected from all covered stores **beginning November 14, 2026**. Timely and accurate daily reporting is essential for reliable MTD monitoring, area consolidation, and Head Office reporting. Store Heads shall ensure consistent daily implementation and monitoring within their respective stores.

For your guidance and strict compliance.
